

UNITED BRAND LUBRICANTS from STAR Energy

United brand lubricants are the Midwest's premier high-quality oils, greases and specialty fluids.

For more than 70 years, the United brand has built and maintained a superior reputation across the region. The United brand has not only survived, but thrived, at a time when many major brand names have struggled to stay in business.

Whether you are looking for quality products to be used in agriculture, trucking, construction or other industry, you've come to the right place. Contact your STAR Energy Specialist for more information and personalized recommendations.

Talk to your STAR Energy representative about any of these United Lubricants products

Diesel/Automotive Oils

United Super Diesel™ – many grades available

Premium multipurpose oils specially designed for both gasoline and diesel engines

United Premium Plus™

United Super Premium Fleet™

Designed for today's OEMs including Mack, Cummins, Detroit Diesel, and Caterpillar

United Non-Detergent Motor Oil™

– many grades available
Can also be used as a GL-1 gear, hoist, or general machine oil

United Special 400™

Ideal for extended highway driving

United ENGINELAST™

Designed for high-mileage engines with more than 75,000 miles

United Select All Season Passenger Car Engine Oils™ – many grades available

Easier starting in low temperatures, excellent performance during high temperatures

United LPG Engine Oil™ – many grades available

For stationary engines using natural gas/LPG fuels

United Syn Gear SAE 50™

For year-round use in on-and-off-highway manual transmissions

United EP 75W-90 Synthetic™

Superior all-season lubrication properties

Greases

United Red MultiPlex #2™

Ideal for automotive, farm, trucking, and industrial applications

United Blue Max Synthetic Blend Grease™

Excellent adhesive characteristics for stay-in-place performance

United Lithium Moly #2™

Economical multi-purpose grease for use in both ball and roller anti-friction bearings

Heavy-Duty Equipment/Industrial Lubricants

United Hy-Vis Hydraulic Oil™

Ideal for equipment operating over a broad temperature range

United Arctic Red Hydraulic™

Heavy duty lubricating oil

United Arctic Blue Hydraulic™

An all-weather, year-round product ideal for outdoor, stationary hydraulic units, snowplows, and hoist applications subjected to extremely cold temperatures

United Industrial Hydraulic™

– ISO Grades 15 through 460
Ideal for automated machine centers and in applications with stringent filterability requirements

United R&O Turbine Oil™ – Grades 32 through 100

Recommended for use in most axial piston pumps

United Hydraulic Plus Oil™

United MV Extreme Hydraulic Fluid™

Multi-grade hydraulic lubricant engineered for extreme temperature ranges

United Multi-Purpose Gear Lube™

Designed for high-speed, low torque, low-speed, high-torque conditions

United All Purpose Gear Lube™ – many grades available

Superior performance in both on- and off-highway, farm and construction equipment

United All Purpose Multi-Grade Gear Lube™

All weather lubricant reduces need for multiple product inventory

United Premium MultiTrans III ATF™

Excellent protection from rust, corrosion, and wear

United TO-4 Fluid™

Meets Caterpillar TO-4 and Allison C-4 requirements

United Green Mineral Gear Lube™

For use in steering gears, universal joints, and low-torque industrial gears

United Mineral Drip Oil™

For applications requiring a drip feed oiling system

United Universal Transdraulic™

Multi-purpose lubricant protects components during idle periods

United Case IH Transdraulic Oil™

Specially formulated for late model J.I. Case and International Harvester farm and industrial equipment

United Zinc Free Industrial Hydraulic™

United Rock Drill/Air Tool Oils™
Recommended for use in pneumatic percussion tools in a wide range of temperatures.

United Timber Pro Bar & Chain™

– many grades available

United HD Way Lubricants™

Specially formulated to meet the needs of machine tools

United Industrial EP Gear Compounds™

– many grades available
Meets all industry gear oil requirements

United SRPO™

United Blend Concrete Form Oil™

Pre-blended and ready-to-use straight from the container

United Cutting Oils™ – many grades available

United Spindle Oils™ – many grades available

For use in any industry where a light-bodied, highly stable oil is required in machine centers

United Special Rust Preventative Oil #20-140™

Protects highly finished surfaces in indoor storage or transit for at least 12 months

United Irrigation Drip Oil™

Specifically designed to lubricate deep well turbine pump bearings

United 105 Mineral Spirits™

United 142 Flash Solvent™
